

The below was hand delivered on my behalf by the Spiritual Services of a hospital that Archbishop O'Malley was visiting in June 2004:

-----

To: Archbishop Sean O'Malley

Re: Risks To Women From Cloning

From: Lynne Millican, R.N.

June 1, 2004

Dear Archbishop O'Malley:

Enclosed please find the following information detailing the health risks that cloning and assisted reproduction technologies pose to women:

- Senate testimony on the 'Risks of Cloning to Women',
- Comments to survey by the President's Council on Bioethics concerning Assisted Reproductive Technologies,
- Oprah magazine 2/04 article 'The terrifying truth about fertility drugs'.

When addressing arguments against therapeutic and reproductive cloning, in addition to defending the life of the embryo - it is my hope that the Church can add discussion of the health risks experienced by women as well.

If I can provide any further information or assistance on this matter, please do not hesitate to contact me.

Sincerely, Lynne Millican
