A.T.
 trying to take it all in

a doctor NOT to go to

I went to a doctor in October. She was through midwest fertility clinic in Elk grove Village, IL. I know they have other offices near Chicago and in Chicago, too. I'm not sure about all the doctors and staff, but Dr. Natalie Schultz was one of the WORST doctors I've seen. She belittled me, was an HOUR late for the appt., and yawned the whole time I was talking. She also kept pushing me to see the nutritionist through her office, which I'd love to do, but my husband is out of work and my insurance doesn't cover a nutritionist. I explained everything to her and she said that maybe I can budget my money better and then I could go see the nutritionist. She was the rudest and unprofessional doctor I've ever come in contact with.
